Your Name

Full-Stack Developer | React / TypeScript / Node.js

email@example.com • +98 900 000 0000 • Tehran, Iran • github.com/yourusername

Summary

Full-stack developer with hands-on experience building web applications using React, TypeScript, Node.js and Express, backed by MySQL and PostgreSQL. Comfortable across the stack, from designing REST APIs and relational schemas to building responsive, accessible front-ends. Replace this placeholder text with your own summary.

Experience

Full-Stack Developer — Company Name (2023 — Present)
Built and maintained features across a Node.js / Express backend and a React + TypeScript front-end. Designed MySQL/PostgreSQL schemas and REST APIs, and shipped UI components used across the product.

Frontend Developer — Previous Company (2021 — 2023)
Developed responsive interfaces with React and TypeScript, collaborated with designers on component libraries, and improved performance and accessibility across key pages.

Skills

React • TypeScript • Node.js • Express • MySQL • PostgreSQL • REST APIs • Git

Education

B.Sc. in Computer Engineering — University Name (20XX — 20XX)
